Voice Over

Artistic roots

With roots in professional acting, I bring emotional intelligence, rhythm and narrative depth to every project – whether it's a documentary-style video, a podcast series, or a hands-on environmental workshop.

Photos: Vera Éder, Samu Mihály Gálos, Dániel Borovi

After graduating as a theatre actor and immersing myself in the art world for a decade, a profound realization dawned upon me –

environmentalism and sustainability

weren't just passions; they were a calling. This revelation prompted a career shift, propelling me into the realm of entrepreneurship and specializing in green non-profits & start-ups.

Awareness Raising

I believe sustainable living begins with small, intentional steps – and sometimes, with uncertainty, dialogue and honest questions. Over the past years, I've been actively involved in promoting and deepening eco-conscious lifestyles through creative projects, community workshops and collaboration with green organizations. For me, sustainability isn't about restriction: it's about creativity, connection and conscious choices.

Living greener is not only possible – it's cool.

Public Speaking

Whether it's on TV, radio or in front of a live audience, showing up and speaking out has always been something I embrace with confidence.

FUTURE - Green Theatre Project

As the founder and project leader of the Future - Green Theatre Project since 2019, I've been on a mission to instill environmental consciousness within Hungarian cultural institutions.

One of my proudest achievements is spearheading sustainability strategies and targets, resulting in tangible transformations in 24 Hungarian theatres.

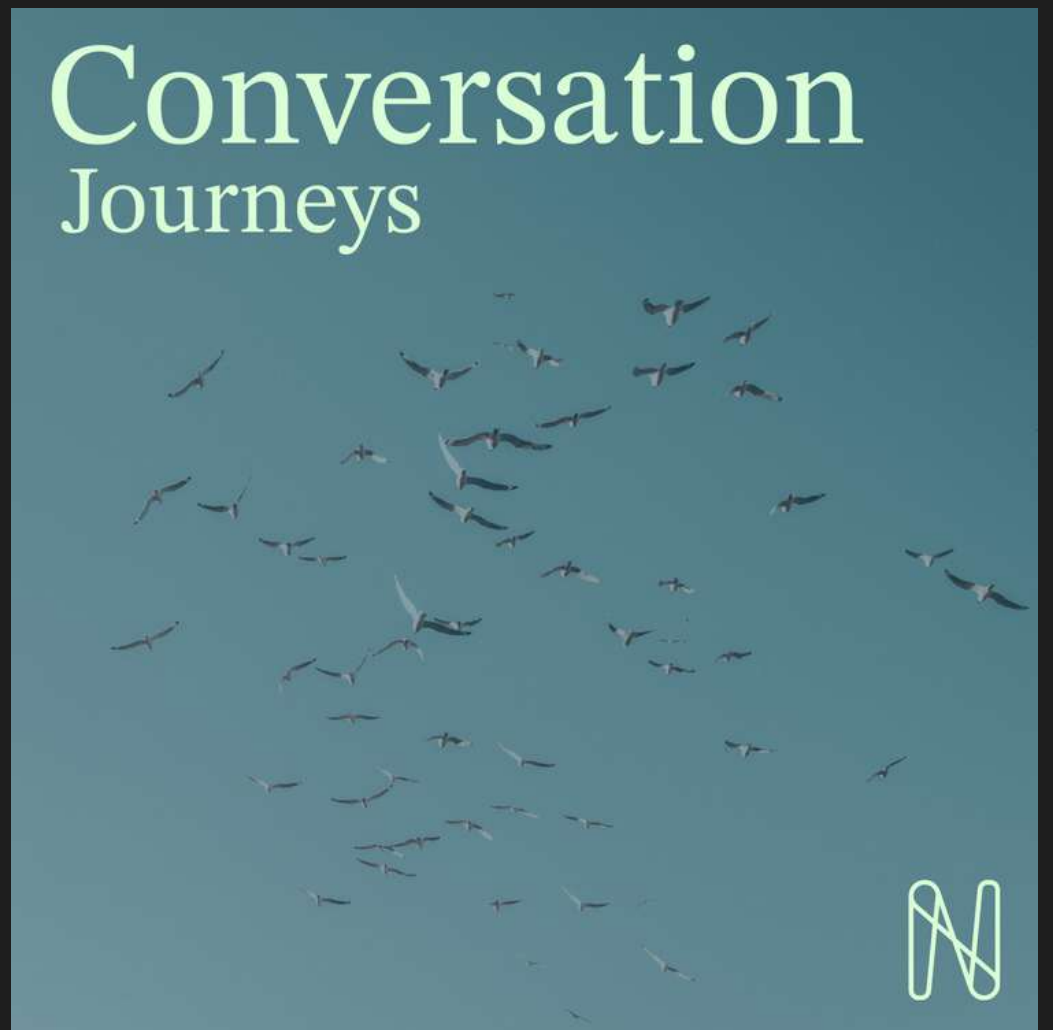

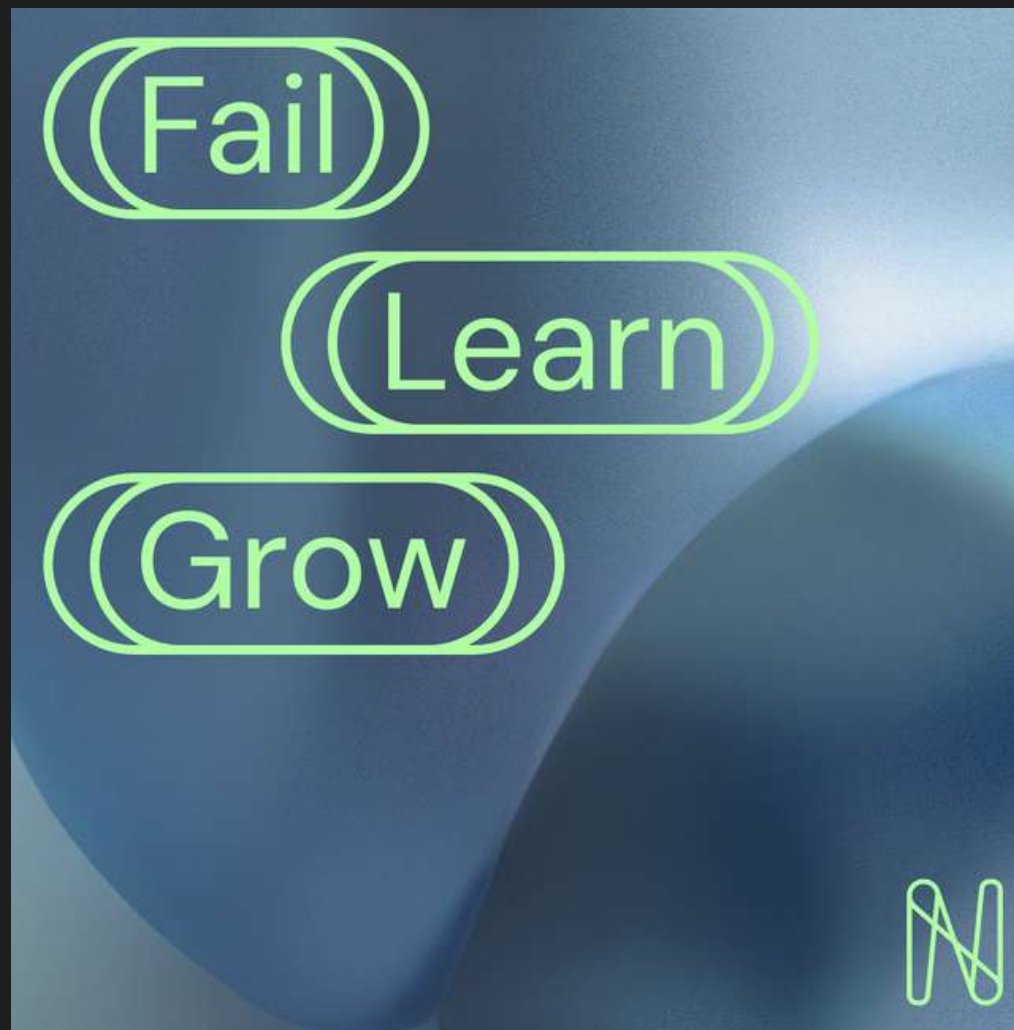

Graphic Design

“
Space4Good's mission is to challenge the status quo and foster positive change for both our planet and society.
”

Podcast Editing/ Voice Over

As a longtime podcast enthusiast, diving into recording & post-production has opened up an entirely new creative dimension for me. It allows me to connect more deeply with interviewees and topics, while shaping rhythm, tone and emotion through the editing process.

It's also a space where I can apply my voice-over and narration skills – areas in which I have hands-on experience.

Photography

As much as I've spent years in front of the camera, I find a deep sense of balance and presence behind it. Photography has been an essential part of my creative life for many years.

I aim to make the camera invisible: to create connection, not distance, between myself and the world I'm documenting.

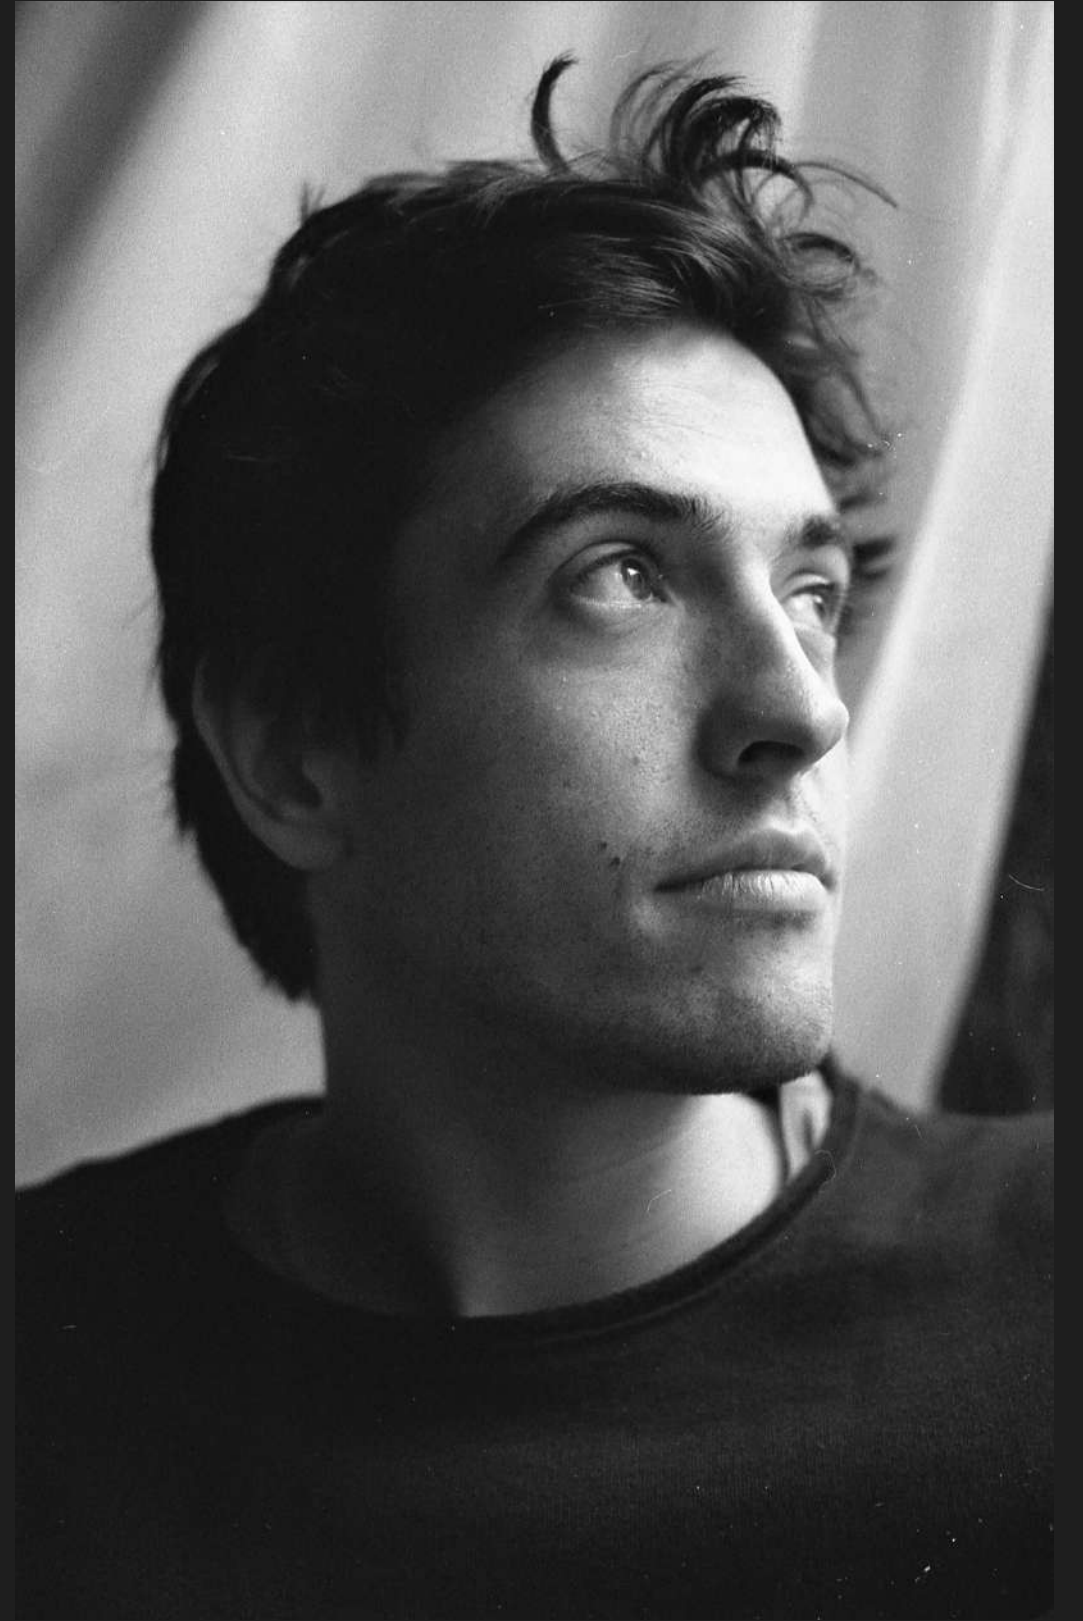

For me, photography has always been closely tied to film reels.

For years, I didn't even own a digital camera – and even when I did, I always felt more grounded, more at ease behind an analogue one.

All the images in this series were captured on film, using a variety of formats and development processes.

THANK YOU

I can't wait to create a new project with you.
Let's get connected.
